About Us

Who We Are

LOT is a blockchain-based lottery platform designed to bring full transparency, automation, and decentralization to online gaming. We are pioneers in merging smart contract technology with verifiable randomness, eliminating manipulation and guaranteeing fairness for every draw.

What We Do

We offer a secure and fair lottery experience on the Polygon blockchain. Each draw is verifiable via Chainlink VRF and every transaction is recorded on-chain. Users can join with just a wallet connection and play knowing that outcomes are truly random and transparent.

Our Mission

To democratize access to honest gaming by building a transparent, borderless lottery platform. Our goal is to create a fair environment where players know the system can't be rigged, and every win is real and verifiable.

Our Vision

To become the leading global platform for decentralized games of chance. We envision a world where lotteries are free from centralized control and where blockchain guarantees fairness, trust, and innovation in online gaming.

Company Values

Responsibility

We are fully committed to transparency and fairness in every game. Each draw is verifiable on the blockchain, and no manipulation is ever possible.

Teamwork

LOT is built by a team of developers, gamers, and crypto enthusiasts working together to redefine trust in online lotteries.

Integrity

Our smart contracts are public, audited, and open-source. We do not hide algorithms – we build them to be verified by anyone.

Why LOT Stands Out

- Built on Polygon for low fees and fast transactions
- Every draw powered by Chainlink VRF (verifiable randomness)
- No central authority – everything runs on smart contracts
- Fully transparent: from ticket purchase to prize payout
- Anyone with a wallet can join, globally

The Facts

We Aim to Reach Over

3,000,000+ USD

IN ANNUAL REVENUE

We Plan to Distribute

30000 + USD
